ABOUT

Full stack developer with a background in wealth management looking to join a team of energetic developers who share my passion for problem solving, learning, and getting things done.

WORK EXPERIENCE

GENERAL ASSEMBLY | *Web Development Fellowship | 2018*

Designed and built full stack web apps using the latest front- and back-end languages, frameworks, and tools.

DogIdentifier - Full Stack App
- React web app and API (constructed using Express and MongoDB) that enables users to identify dog breeds from uploaded photos
- Stores user photos on Amazon S3 and processes them using Google Vision's API
- Utilizes Axios, Passport, and Bootstrap 4

Before You Quack - Full Stack App
- Team built, duck inspired responsive JavaScript web app and API (constructed using Express and MongoDB) that enables users to store and edit bucket list items
- Created using Git Workflow with merge requests and feature branches
- Utilizes AJAX, Handlebars, jQuery and Bootstrap 4

InstaMeals - Full Stack App
- Responsive Javascript web app and API (constructed using Ruby on Rails and PostgreSQL) that enables users to share, store and edit recipes
- Utilizes AJAX, Handlebars, jQuery and Bootstrap 4

LAIRD NORTON WEALTH MNGT | *Associate/Senior Associate | 2015 - 2018*

Developed and delivered personalized financial advice to 93 family and trust client relationships ($294M AUM).
- Created and led new employee training program
- Participated in the development and launch of new investment platform
- Played key role in the creation of new policies and procedures after firm-wide restructuring

ROYAL FINANCIAL | *Planning Assistant | 2014 - 2015*

- Built and maintained the firm's three mutual fund portfolio models
- Created custom portfolio attribution analysis model and implemented quarterly review process

JOHN HANCOCK | *Financial Rep | 2013 - 2014*

- Provided clients with insurance and financial planning advice
